

Green Burial Council Burial Body Care Product Certification Standards

To be considered for certification, a body care product must:

- ✿ Make the full ingredient list publicly available and easily accessible
- ✿ Contain minimal PBT (persistent, bioaccumulating, toxic) chemicals
- ✿ Contain minimal CMR (carcinogenic, mutagenic, reprotoxic) chemical

Products which meet the above minimum requirements are then evaluated across 3 criteria to determine what level of certification they will receive:

- ✿ Product does not contain any ingredients included in the CDC's list of carcinogenic and reprotoxic chemicals
- ✿ Product does not contain any ingredients included in the EPA's list of PBT (persistent, bioaccumulating, toxic) chemicals
- ✿ Product is entirely made with ingredients on the FDA's list of GRAS (generally recognized as safe) chemicals
